Art Unit: 2829

DETAILED ACTION

1. Applicant's argument filed on 10/07/04 with respect to the restriction requirement is persuasive, and thus the restriction requirement mailed on 09/09/04 hereby withdrawn.

A new Office Action is presented below.

Election/Restrictions

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-10, 15-20, drawn to an apparatus for measuring power consumption comprising a rectifying unit, a transforming, a switching unit and a voltage regulating, and a control unit, classified in class 324, subclass 142.
 - II. Claims 11-14, drawn to a method of calculating power consumption of an electronic device, which is powered through a transformer, classified in class 324, subclass 158.1.
 - III. Claims 21-26, drawn to a switching mode power supply for powering an electronic device from a DC voltage and having a power consumption measuring function, classified in class 324, subclass 158.1.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions II and (I & III) are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP §

806.05(e)). In this case the apparatus as claimed can be used to practice another different process such as by determining a drive voltage across the primary coil; generating a pulse waveform having a first level corresponding to an ON time of current in the primary coil and a second level; and determining the input current based on the drive voltage across the primary coil.

4. Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions:

Invention I is different from invention III, because invention I is draw to an apparatus for measuring power consumption; on the other hand, the invention III is draw to a switching mode power supply for powering an electronic device from a DC voltage.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for any Group is not required for another Group, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Page 4

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tung X Nguyen whose telephone number is (571) 272-1967. The examiner can normally be reached on 8:30am-5:00pm M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Tokar can be reached on (571) 272-1812. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
